Investment Objective

The Fund's objective is to provide high income and long-term capital appreciation. It invests primarily in a diversified portfolio of high yielding equity securities and convertible debentures of Canadian companies, real estate investment trusts and income and royalty trusts. It may also invest in money market instruments and fixed income investments issued by Canadian or foreign corporations and governments.

Volatility Analysis

It is important to note how a model's performance fluctuates over time. More volatile investments are those that experience more exaggerated price increases or decreases. Generally speaking investors with a shorter time horizon should avoid higher volatility investments. However, it is worth noting that some of the risk associated with highly volatile investments can be offset through proper portfolio construction.
