

Annual Management Report of Fund Performance

December 31, 2007

Galileo High Income Plus Fund

Management Discussion of Fund Performance

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund invests in a diversified portfolio of high yielding equity securities and convertible debentures of Canadian companies, real estate investment trusts (“REITs”) and income and royalty trusts. It aims to provide high income distributed monthly. The Fund may invest in foreign securities, which will vary from time to time. Foreign securities are not typically expected to exceed 15% of the net assets of the Fund at the time of purchase.

As part of its strategy, the Fund may engage in short selling as a result of special relief it obtained from the Canadian securities regulators and engage in securities lending as permitted by securities regulators.

RISK

The Fund pays a monthly distribution to unitholders. As such, we strive to ensure the sustainability of the dividends/distributions from the securities held by the Fund. The key to the sustainability is to invest in high quality securities and also to ensure a diversity of the investments. The Fund holds dividend paying stocks, preferred shares, REITs, business trusts and unit trusts. It is also important to diversify between the various industry sectors and the Fund has strived to limit its exposure to any one sector and in particular the energy sector to ensure the sustainability of the distribution.

Investors in the Fund should have a long-term investment horizon.

The Fund did not participate in any short selling or securities lending during 2007.

RESULTS OF OPERATIONS

The 2007 performance of the fund was 7.1% and 8.1% for the Class A and Class F units of the Fund respectively, beating out its benchmark. The Fund’s benchmark is a blend of 60% S&P/TSX Capped Income Trust Index, 25% S&P/TSX Composite Index and 15% Scotia Capital Bond Universe Index. The benchmark return was 6.81% for the period.

The energy securities in the portfolio performed well and in particular Crescent Point Energy Trust and Black Diamond Income Trust performed strongly. Also GMP Capital Trust and AG Growth Income Fund were among our top performers. Essential Energy Services Trust and Fairborne Energy Trust were among the securities that brought the Fund’s performance down.

Trading expense ratio ⁽⁴⁾	0.76%	3.12%	0.76%	3.12%

- (1) This information is provided at December 31 of the period shown, as applicable.
- (2) Management expense ratio for each class of units is based on the total expenses of the Fund, incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

MANAGEMENT FEES

The Fund pays an annual fee of 1.90% of the net asset value of Class A and 0.90% of the net asset value of Class F plus GST to the Fund Manager in consideration for the provision of management, distribution and Fund advisory services. This management fee is calculated as a percentage of the Fund's net asset value per class and is calculated and credited daily. The Fund is required to pay Goods and Services Tax (GST) on the management fee.

PAST PERFORMANCE

The performance information shown below assumes that all distributions made by the Fund in the period shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. It is important to note that the past performance of the Fund does not tell you how the Fund will perform in the future.

Year-by-year Returns

The following bar chart indicates the Fund's historical annual returns, which will vary from period to period. It shows the percentage change in value of an investment from the first day to the last day of each fiscal year, as applicable.

* Return is for a partial year starting November 14th, 2006 (the date the Fund first became eligible for purchase via simplified prospectus).

Annual Compound Returns

The following table shows the Fund's historical average annual compound returns compared with its benchmark, a blend of 60% S&P/TSX Capped Income Trust Index, 25% S&P/TSX Composite Index and 15% Scotia Capital Bond Universe Index for the periods ended December 31, 2007. The inception of the Fund was November 14, 2006.
