

Semi-annual Management Report of Fund Performance

June 30, 2008

Galileo Small/Mid Cap Fund

Management Discussion of Fund Performance

INVESTMENT OBJECTIVE AND STRATEGIES

The Fund invests primarily in shares of smaller and medium North American companies that are expected to profit from future economic growth, and may also invest in income and royalty trusts.

The portfolio manager uses a bottom-up, growth investment style. It seeks to invest in companies at an early stage of their development and hold them until they achieve success through rising sales, earnings and cash flow.

As part of its strategy, the Fund may engage in short selling as a result of special relief it obtained from the Canadian securities regulators and engage in securities lending as permitted by securities regulators.

RISK

In anticipation of highly volatile markets continuing in the first half of 2008, the fund maintained a very large cash position. The cash & cash equivalents position is now 35.6% of the total assets of the fund. The portfolio remaining overwhelmingly invested in Canadian securities. Only 5.6% of assets were invested outside of Canada.

Investors in the Fund should have a long-term investment horizon. As this Fund invests in smaller and medium sized companies, there are general risks such as stock market and smaller company risks, among other risks, which are associated with such investments.

The Fund did not participate in any short selling or securities lending during 2008.

RESULTS OF OPERATIONS

The Fund performed almost in line with the benchmark for the first half of 2008. The performance was (0.7)% and (0.2)% for the Class A and Class F units of the Fund respectively, compared with the Fund's benchmark performance of (0.5)%. The benchmark is a blend of 50% the S&P/TSX Small Cap Index and 50% the S&P/TSX Mid Cap Index. The S&P/TSX Mid Cap Index had a return of (0.5%) and the S&P/TSX Small Cap Index had a return of (0.4)% for the period.

Securities that performed particularly well, relative to the Index, included Agrium Inc, Trinidad Drilling Ltd, and Celestica Inc. Also a number of gold companies held in the portfolio were strong performers.

In the Canadian markets, the performance of the TSX was driven by a small handful of large cap securities in the energy and materials sectors. The smaller and mid cap securities underperformed the large cap index.

RECENT DEVELOPMENTS

The Fund has been given exemptive relief from the regulators to invest in the BetaPro family of closed end funds.

- (1) Net assets and distributions are based on actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (2) The Fund was launched in September 2000 with 1 class of units. It was sold via an offering memorandum and was therefore open only to accredited investors. In November 2006, the various provincial securities commissions approved the prospectus of the Fund. At this time, the original class of units became Class F and a 2nd class of units, Class A, was launched. As such, the beginning of the 2006 period for Class A is November 14th, 2006 and for Class F is January 1st, 2006.
- (3) Distributions were reinvested in additional units of the Fund.

- (1) This information is provided at June 30 or December 31 of the period shown, as applicable.
- (2) Management expense ratio for each class of units is based on the total expenses of the Fund, incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

MANAGEMENT FEES

The Fund pays an annual fee of 1.95% of the net asset value of Class A and 0.95% of the net asset value of Class F plus GST to the Fund Manager in consideration for the provision of management, distribution and Fund advisory services. This management fee is calculated as a percentage of the Fund's net asset value per class and is calculated and credited daily. The Fund is required to pay Goods and Services Tax (GST) on the management fee.

PAST PERFORMANCE

The performance information shown below assumes that all distributions made by the Fund in the period shown were reinvested in additional units of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. It is important to note that the past performance of the Fund does not tell you how the Fund will perform in the future.

Year-by-year Returns

The following bar chart indicates the Fund's historical annual returns, which will vary from period to period. It shows the percentage change in value of an investment from the first day to the last day of each fiscal period, as applicable.

* Return is for a partial year starting November 14th, 2006 (the date the Fund first became eligible for purchase via simplified prospectus).

Annual Compound Returns

The following table shows the Fund's historical average annual compound returns compared with its benchmark, a blend of 50% the S&P/TSX Small Cap Index and 50% the S&P/TSX Mid Cap Index for the periods shown ended June 30, 2008. The inception of the Fund was November 14, 2006.
